ABOUT MYSELF

Senior Frontend Developer with over 5 years of experience, highly specialized in building enterprise-grade applications. Experienced in working with a diverse range of full-stack technologies and delivering scalable, maintainable solutions.

WORK EXPERIENCE

 **DIVAACO** – HEMEL HEMPSTEAD, UNITED KINGDOM
SENIOR FRONTEND ENGINEER (TEAM LEAD) – 03/2023 – CURRENT

Leading and mentoring frontend development team to design, develop, and maintain projects.
Contributes to architectural and functional design decisions.
Develop key application modules.
Panelist on Divaaco's interview panel.
Utilize TypeScript, React.js, Next.js, MUI, Nest.js, Docker, PostgreSQL, and AWS among other technologies.

 **HIDDEN LOGICS** – PAKISTAN
FULL-STACK SOFTWARE ENGINEER – 12/2022 – 03/2024

Served as a full-stack developer, developing a CRM Application.
Contributed to the app architecture, shaping the platform's strategic direction.
Mentored two interns for professional development, enhancing the team's success.
Participated in the hiring process by interviewing developer candidates.

 **DIGINATIVES** – LAHORE, PAKISTAN
ASSOCIATE SOFTWARE ENGINEER – 02/2022 – 12/2022

Worked as a frontend developer, creating responsive interfaces using React and Next.js
Contributed to the development of an e-commerce platform, and two management systems.
Enhanced communication skills through interactions with various stakeholders.

 **SELF EMPLOYED (FREELANCE)**
GRAPHIC DESIGNER – 12/2019 – 02/2022

Assisted clients in establishing their businesses by providing top-notch design solutions.
Enhanced communication skills through interactions with clients worldwide.

PROJECTS

08/2023 – 25/12/2024
Reporting App for Motorola Solutions @Divaaco

Led frontend development for a data-heavy reporting platform serving Motorola's transmission and procurement teams.
Built an interactive map with Leaflet and ArcGIS to visualize large number of interactive network nodes and connections using clustering and virtualization for performance. Developed a self-serve reporting module enabling users to generate dynamic reports via drag-and-drop. Optimized reports to handle large data with virtualization, server-side pagination, and materialized views. Tech: React, NestJS, PostgreSQL, MUI, AWS, Nginx, Python.

05/2023 – 09/2024
Business Intelligence Portal @Divaaco

A SaaS platform enabling organizations to generate BI reports. Designed a self-serve reporting module with widgets, editing tools, and integration management. Contributed to the development of user management, dynamic access

controls, white labeling, and OAuth 2 integration with platforms like Amazon, Shopify, and GA4. Tech stack: React.js, MUI, Redux, Nest.js, PostgreSQL, AWS. Project link: <https://bi.divaaco.com/>

11/2024 – CURRENT

ERP System for Beacon House Care Home

Role: Frontend Development Team Lead

Leading the development of an ERP system for Beacon House Care Home, focusing on scalability and performance by implementing modular, and feature-driven architecture. Working on key modules including, Employee Management, Care Homes Management, Staff Scheduling, Residents Management, Centralized Notification, Reporting, Invoicing, and HR. Tech stack includes React, MUI, React Query, Docker, NestJS, Postgres, AWS

12/2024 – CURRENT

AI-Powered Chatbot Builder (In Development)

Role: Full Stack Developer

Developing an AI-powered chatbot builder that enables users to create custom chatbots trained on their own data. The platform offers easy-to-use interfaces for training chatbots with specific datasets and seamlessly integrating them into websites.

12/2022 – 03/2023

CRM Application @Hidden Logics

Played a pivotal role in architecting and developing a CRM application for a U.S.-based sales firm. I oversaw the development of messaging, calling, appointment scheduling, task management, and user authentication modules.

02/2022 – 04/2022

A B2B sales platform for Sunglass Hut @Diginatives

As a key contributor, I helped develop and maintain a B2B e-commerce platform for Sunglass Hut. The platform was a PWA built using Next.js, SWR, CSS Modules, Material UI, and React Context API.

● **SKILLS**

Languages and Frameworks

React JS | Next JS | Typescript | MUI | TailwindCSS | Nest JS | Express.js | Angular Js | PostgreSQL | Nginx | Docker | AWS | AI Integration | prisma | MongoDB | Redux | Git | HTML | CSS | React Query | figma | Linux (Ubunto)

● **EDUCATION AND TRAINING**

08/2015 – 07/2019 Swabi, Pakistan

BS ELECTRICAL ENGINEERING GIK Institute
